3. When any horse is diseased the owner or person in charge thereof shall—

9 A certificate of a Veterinary Practitioner under section 8 of the Act that any horse is diseased shall not be valid unless it is in Form No 2 in the Schedule hereto annexed, and has been countersigned by the Superintendent, Civil Veterinary Department, or by some officer deputed by him in that behalf.

(*2*) The means of disposal to be adopted shall be decided in each case by the Inspector, and shall be recorded in writing, and the work shall be carried out under his supervision.

Message begins.—The Princes and people of India desire to take the opportunity afforded by the conclusion of the Royal visit to convey to the great English nation an expression of their cordial goodwill and fellowship, also an assurance of their warm attachment to the world-wide Empire of which they form part, and with which their destinies are now indissolubly linked.

NOTICES TO MARINERS.

The following Notices are published for general information.

C. A. WHITE,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 5th February 1912.*

BRITISH POSSESSIONS.

Caution when approaching British Ports.

No. 60 (first publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 1 of 1912), are republished:—

PART I.

CLOSING OF PORTS.

(1) My Lords Commissioners of the Admiralty, having taken into consideration the fact that local or other circumstances may arise in which it may be necessary, on account of periodical exercises, manœuvres, or otherwise, to forbid all entrance to certain ports of the Empire, this is to give Notice that on approaching the shores of the United Kingdom, or any of the ports or localities of the British Empire, referred to in Part III of this Notice, a sharp look-out should be kept for the signals described in the following paragraph, and for the vessels mentioned in paragraph (2), Part II, of this Notice, and the distinguishing and other signals made by them. In the event of such signals being displayed, the port or locality should be approached with great caution, as it may be apprehended that obstructions may exist.

(2) If entrance to a port is prohibited, three *red* vertical lights by night, or three *red* vertical balls by day, will be exhibited in some conspicuous position, in or near to its approach, which signals will also be shown by the vessels indicated in paragraph (2), Part II, of this Notice.

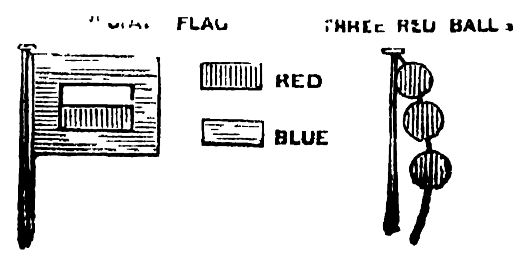
If these signals are displayed, vessels must either proceed to the position marked "Examination Anchorage" on the Admiralty charts and anchor there or keep the sea.

(3) At all the ports or localities at home or abroad referred to in Part III of this Notice, search-lights are occasionally exhibited for exercise.

Instructions have been given to avoid directing moveable search-lights during practice on to vessels under way, but mariners are warned that great care should be taken to keep a sharp look-out for the signals indicated in paragraph (2) above, when search-lights are observed to be working

PART II

Examination Service.



(1) Under certain circumstances it may become necessary to take special measures to examine vessels desiring to enter the ports or localities at home or abroad, referred to in Part III of this Notice

(2) In such case, vessels carrying the distinguishing flags or lights mentioned in paragraph (4) will be charged with the duty of examining ships which desire to enter the ports and of allotting positions in which they shall anchor.

(3) As the institution of the Examination Service at any port will never be publicly advertised, especial care should be taken in approaching the ports, by day or night, to keep a sharp look-out for any vessel carrying the flags or lights mentioned in paragraph (4), and to be ready to "bring to" at once when hailed by her or warned by the firing of a gun or sound rocket

(4) By day the distinguishing flags of the Examination Steamer will be a special flag (white and red horizontal surrounded by a blue border) and a blue ensign

Also, three red vertical balls if the port is closed.

By night the steamer will carry—

(a) Three *red* vertical lights if the port is closed.
(b) Three *white* vertical lights if the port is open.

The above lights will be carried in addition to the ordinary navigation lights, and will show an unbroken light around the horizon.

(5) Masters are warned that, before attempting to enter any of these ports when the Examination Service is in force, they must in their own interests strictly obey all instructions as to entry given to them by the Examination Steamer In the absence of any instructions from the Examination Steamer they must proceed to the position marked "Examination Anchorage" on the Admiralty Charts and anchor there, or keep the sea.

(6) In case of fog, Masters of vessels are enjoined to use the utmost care, and the Examination Anchorage itself should be approached with caution

(7) The pilots attached to the ports will be acquainted with the regulations to be followed

ADMIRALTY PUBLICATIONS

True bearings to be introduced.

No. 61 (first publication) —The following particulars, etc., relative to the above, issued by the British Admiralty (No 2 of 1912), are republished —

Notice is hereby given that, on and after the date of this Notice, TRUE bearings will be introduced as soon as practicable in all Admiralty Publications.

Details of the new system are as follows —

(*a*) On charts:

A new pattern compass is already being gradually introduced which enables True Bearings to be laid off on the chart in addition to Magnetic Bearings as at present. (*See* diagram overleaf)

The compass consists of two graduated circles, clearly separated from each other.

The outer circle is a True compass, graduated from 0° (True North) to 360°, measured clockwise.

The inner circle is a Magnetic compass, graduated in points and in degrees from 0° to 90° as heretofore.

The bearings of leading and clearing marks, etc, will be given both True and Magnetic, and a note to this effect will be placed in the title of the charts. (*See* overleaf.)

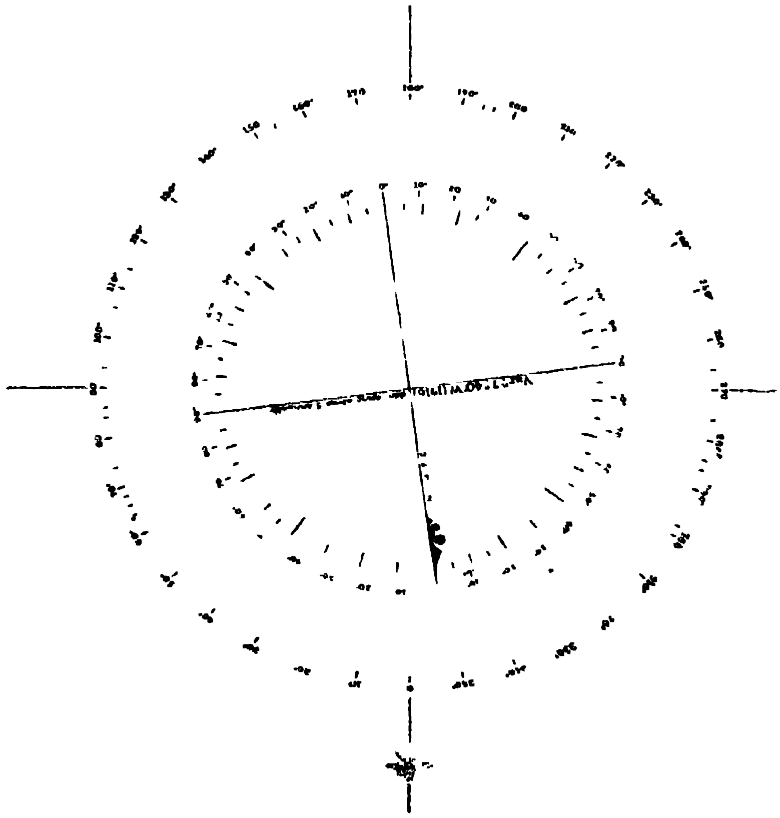
Example.—The bearing S. 40° W. true, with a Variation of 12° Easterly, will be shown thus 220° (*S 28° W. Mag.*)

(*b*) In Sailing Directions:

Bearings will be given as True only, in degrees from 0° (North) to 360°, measured clockwise; and a note to this effect will be given in the Title-page, in the Advertisement, and in the page immediately preceding page 1 of all volumes of Sailing Directions. The variation will continue to be given on each page as at present, so that Magnetic bearings may be obtained when required

This alteration will be introduced gradually.

(*c*) In Notices to Mariners:



All bearings will be given both True and Magnetic in a similar manner to that adopted on charts, the necessary alteration having been now made in the heading of the Notices.

(*d*) Lists of Lights.

Bearings will be given as True only, in degrees from 0° (North) to 360°, measured clockwise

On each page of the Lists of Lights in which this alteration has been carried out, a footnote will be placed stating that all bearings are **TRUE FROM SEAWARD.**

New Pattern Compass.

DEPARTMENT OF AGRICULTURE, BENGAL.

THIRD AND FINAL FORECAST OF THE WINTER RICE CROP OF BENGAL, 1911.

[On an average of five years ending 1909-10, the area under winter rice in the territory to which the forecast relates represents about 26 5 per cent of the total area under winter rice in British India]

Character of the season —The monsoon arrived a few days before the normal date, but the advance was of a temporary nature. In June the rainfall was slightly defective in several districts of Lower Bengal, but it was generally above the average in the rest of the Province. The rainfall in July was insufficient in many districts and transplantation was delayed in consequence. In the early part of August there was good and sufficient rain in most districts and satisfactory progress was made in the work of transplantation. The rainfall in September and October did much good to the crop at the time of its maturity.

Area sown.—The total area sown with the crop is now returned at 19,554,900 acres, against 20,947,400 acres last year The normal area under the crop is estimated to be 19,916,600 acres The decrease in the area sown this year is due to want of sufficient rain at the time of transplantation

Outturn —In Midnapore, Hooghly, Nadia, Patna, Saran, Champaran, Muzaffarpur, the Sonthal Parganas and Manbhum a better crop has been harvested than was expected when the second forecast was issued in December, but in the 24-Parganas, Monghyr, Cuttack, Hazaribagh and Singhbhum the outturn is estimated somewhat below the previous estimate In the remaining districts the estimate is unchanged From Appendix I it will be seen that the following districts report more than a normal crop.—

Saran 133 per cent., Darbhanga 126 per cent., Muzaffarpur 125 per cent., Champaran 123 per cent., Bhagalpur 114 per cent, Sonthal Parganas and Manbhum 113 per cent. each, Hazaribagh 106 per cent, Birbhum 103 per cent. and Patna 102 per cent. Gaya, Purnea, Sambalpur, Ranchi and Palamau report a normal crop. Seven districts report crops between 90 and 99 per cent, and six districts between 83 and 85 per cent Hooghly and the 24-Parganas each report 72 per cent. crops In the remaining three districts the outturn of the crop is reported as follows.—

Howrah 65 per cent, Singhbhum 64 per cent. and Balasore 60 per cent.

According to the estimates of the District Officers the total outturn of the crop for the Province as a whole works out to 98 per cent. of the normal, against 95 per cent. estimated by them in the second forecast. I see no reason, however, to alter the opinion previously expressed that the outturn will not fall short of the normal.

Accepting 100 per cent. as the Provincial outturn, the gross yield of the cleaned winter rice crop for the Province is estimated at 215,503,000 cwts., against 258,550,800 cwts. of last year.

Director of Agriculture, Bengal.

CORPORATION OF CALCUTTA.

NOTICE

CLAUSE 10 of the Bye-laws under section 559 (51) of the Calcutta Municipal Act prescribing the conditions under which persons are permitted to drive registered carts, which were sanctioned by the Local Government in 1905 and are at present in force, reads as follows :—

"Every driver shall carry with him, when plying for hire, the cart license for the then current half-year or when the driver or person in charge of a cart is not its proprietor he shall carry with him a copy of the said license, under the signature of the proprietor, and produce it for inspection whenever required to do so by any Municipal or Police Officer or the hirer of the cart "

It has been represented by some cart-owners that it is inconvenient for the drivers to carry the licenses with them as they would soon be torn or lost. In view of the fact that at the time of registration the license number is branded on the cart and a metal ticket is also given the General Committee are of opinion that the condition as to the production of the license may be dispensed with. They accordingly propose to recommend that clause 10 of the bye-laws be repealed.

Notice of the proposal is given for information in compliance with section 565 of the Calcutta Municipal Act. Objections, if any, will be received up to Monday, the 1st April 1912, and may be addressed to the undersigned.

BRITISH POSSESSIONS

Caution when approaching British Ports.

No. 60 (second publication).—The following particulars, etc, relative to the above, issued by the British Admiralty (No. 1 of 1912), are republished —

PART I.

Closing of Ports

(1) My Lords Commissioners of the Admiralty, having taken into consideration the fact that local or other circumstances may arise in which it may be necessary, on account of periodical exercises, manoeuvres, or otherwise, to forbid all entrance to certain ports of the Empire, this is to give Notice that on approaching the shores of the United Kingdom, or any of the ports or localities of the British Empire, referred to in Part III of this Notice, a sharp look-out should be kept for the signals described in the following paragraph, and for the vessels mentioned in paragraph (2), Part II, of this Notice, and the distinguishing and other signals made by them In the event of such signals being displayed, the port or locality should be approached with great caution, as it may be apprehended that obstructions may exist.

(2) If entrance to a port is prohibited, three *red* vertical lights by night, or three *red* vertical balls by day, will be exhibited in some conspicuous position, in or near to its approach, which signals will also be shown by the vessels indicated in paragraph (2), Part II, of this Notice

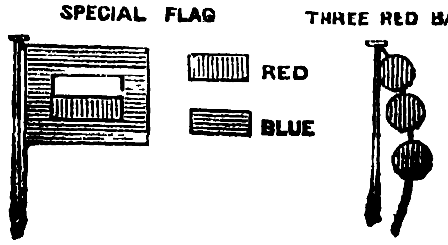
If these signals are displayed, vessels must either proceed to the position marked "Examination Anchorage" on the Admiralty charts and anchor there or keep the sea.

(3) At all the ports or localities at home or abroad referred to in Part III of this Notice, search-lights are occasionally exhibited for exercise.

Instructions have been given to avoid directing moveable search-lights during practice on to vessels under way, but mariners are warned that great care should be taken to keep a sharp look-out for the signals indicated in paragraph (2) above, when search-lights are observed to be working

PART II

Examination Service



(1) Under certain circumstances it may become necessary to take special measures to examine vessels desiring to enter the ports or localities at home or abroad, referred to in Part III of this Notice

(2) In such case, vessels carrying the distinguishing flags or lights mentioned in paragraph (4) will be charged with the duty of examining ships which desire to enter the ports and of allotting positions in which they shall anchor

(3) As the institution of the Examination Service at any port will never be publicly advertised, especial care should be taken in approaching the ports, by day or night, to keep a sharp look-out for any vessel carrying the flags or lights mentioned in paragraph (4), and to be ready to "bring to" at once when hailed by her or warned by the firing of a gun or sound rocket

(4) By day the distinguishing flags of the Examination Steamer will be a special flag (white and red horizontal surrounded by a blue border) and a blue ensign

Also, three red vertical balls if the port is closed

By night the steamer will carry —

(a) Three *red* vertical lights if the port is closed.
(b) Three *white* vertical lights if the port is open.

The above lights will be carried in addition to the ordinary navigation lights, and will show an unbroken light around the horizon.

(5) Masters are warned that, before attempting to enter any of these ports when the Examination Service is in force, they must in their own interests strictly obey all instructions as to entry given to them by the Examination Steamer In the absence of any instructions from the Examination Steamer they must proceed to the position marked "Examination Anchorage" on the Admiralty Charts and anchor there, or keep the sea

(6) In case of fog, Masters of vessels are enjoined to use the utmost care, and the Examination Anchorage itself should be approached with caution

(7) The pilots attached to the ports will be acquainted with the regulations to be followed

***True** bearings to be introduced.*

No. 61 (second publication).—The following particulars, etc, relative to the above, issued by the British Admiralty (No 2 of 1912), are republished —

Notice is hereby given that, on and after the date of this Notice, TRUE bearings will be introduced as soon as practicable in all Admiralty Publications

Details of the new system are as follows —

(*a*) On charts·

A new pattern compass is already being gradually introduced which enables True Bearings to be laid off on the chart in addition to Magnetic Bearings as at present. (*See* diagram overleaf)

The compass consists of two graduated circles, clearly separated from each other

The outer circle is a True compass, graduated from 0° (True North) to 360°, measured clockwise.

The inner circle is a Magnetic compass, graduated in points and in degrees from 0° to 90° as heretofore.

The bearings of leading and clearing marks, etc, will be given both True and Magnetic, and a note to this effect will be placed in the title of the charts. (*See* overleaf)

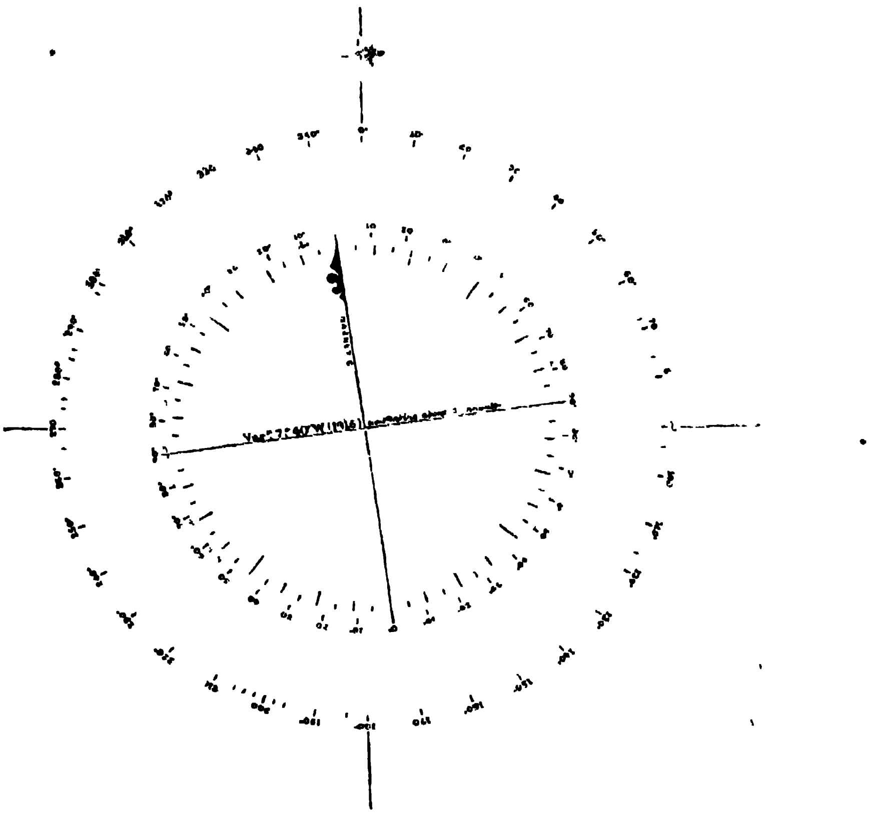
Example.—The bearing S. 40° W true, with a Variation of 12° Easterly, will be shown thus 220° (*S. 28° W Mag.*)

(*b*) In Sailing Directions

Bearings will be given as True only, in degrees from 0° (North) to 360°, measured clockwise; and a note to this effect will be given in the Title page, in the Advertisement, and in the page immediately preceding page 1 of all volumes of Sailing Directions The variation will continue to be given on each page as at present, so that Magnetic bearings may be obtained when required

This alteration will be introduced gradually.

(*c*) In Notices to Mariners



All bearings will be given both True and Magnetic in a similar manner to that adopted on charts, the necessary alteration having been now made in the heading of the Notices.

(*d*) Lists of Lights:

Bearings will be given as True only, in degrees from 0° (North) to 360°, measured clockwise

On each page of the Lists of Lights in which this alteration has been carried out, a footnote will be placed stating that all bearings are **TRUE FROM SEAWARD.**

New Pattern Compass.

From—M. G. HALLETT, ESQ., I.C.S, Offg Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

Member in charge:
THE HON'BLE MR. D. J. MACPHERSON, C.I E., I C.S.

I AM directed to submit the following report on the state of the salt market for the third quarter of the year 1911-12, comprising the months of October, November and December 1911.

2. The quantity of salt of every description cleared during the quarter amounted to 3,335,384 maunds (including 1,415,033 maunds issued under the credit system), as compared with 2,886,778 maunds (including 1,193,599 maunds issued under the credit system) in the previous quarter, and 2,944,191 maunds (including 1,007,738 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 29,00,801 (including Rs. 11,90,563 adjusted under the credit system), as against Rs. 24,29,478 (including Rs. 10,03,989 adjusted under the credit system) in the previous quarter, and Rs. 18,91,418 (including Rs. 1,99,174 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the port

as compared with the figures of the corresponding quarters of the two previous years :—

* Inclusive of 1,115,033 maunds of salt issued under the credit system. Besides this quantity, 15,018 maunds of salt were issued under the credit system to inland bonded warehouses in the Province of Eastern Bengal and Assam

Compared with the corresponding quarter of the previous year and the same quarter of 1909-10, importations were greater by 20·4 per cent. and 21 2 per cent., respectively, and clearances were greater by 13·4 and 23 8 per cent. As compared with the corresponding period of the previous year, the increased imports from Spain, the United Kingdom, Aden and Bombay and the decreased imports from Port Said and Hamburg and Bremen are specially noticeable The large increase in clearances is mainly due to the sudden fall in the prices of salt in the middle of December 1911, referred to in paragraph 9 of this report, in consequence of which dealers made large speculative purchases in addition to ordinary requirements.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter, as compared with the preceding four quarters.—

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director-General of Commercial Intelligence when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 883 maunds, as against 2,650 maunds in the previous quarter and 1,158 maunds in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to 1,418 maunds (inclusive of 60 maunds of *sitta*), as compared with 3,491 maunds (inclusive of 320 maunds of *sitta*) in the previous quarter, and 1,079 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the port of Calcutta according to the published market reports amounted to 36,878 tons. It is reported that the vessels named in the margin are on the sea bound for Calcutta with cargoes of salt from Bremen. The quantity given against each ship is approximate only.

* The prices are exclusive of Port Commissioners' special toll of 4 annas per ton and Customs duty of 1 rupee per maund.

During the quarter the prices of Bombay *karkuch* fell gradually, while there was a slump in those of all other descriptions of salt in the last fortnight of the quarter. This sudden fall is attributed to the importation of a consignment of Aden salt, the owners of which are not among the firms who had combined to fix the price of salt. Rates have consequently been greatly lowered by the combine against the new comer. There were no imports of Madras salt into the port of Calcutta during the quarter.

10. The quantities of sea-imported salt admitted into and cleared from bond at the inland warehousing station of Chandbali in the district of Balasore, during the quarter and the corresponding quarter of the previous year, are given below:—

DEPARTMENT OF AGRICULTURE, BENGAL.

FOURTH REPORT ON THE COTTON CROPS OF BENGAL, 1911-12.

[On an average of the five years ending 1909 10, the area under the cotton crop in the territory to which this forecast relates represents about 0 9 per cent of the total area under cotton in India]

Explanatory.—This is the final report on the cotton crops of Bengal for the year 1911-12 It deals with the revised estimates of the area and outturn of the crops since the issue of the third report in December.

Character of the season—The early crop is most important in Ranchi, where it covers about half the total area under the crop in the Province. The less important districts are the Sonthal Parganas, Angul, Manbhum, and Singhbhum. Weather conditions were favourable for the early crop. The late crop is most important in Saran where prospects are reported to be good. In parts of Darbhanga and Cuttack, however, the crop has been affected somewhat by excessive rain in the former and want of timely rain in the latter. The season was on the whole favourable for the cotton crops.

Area sown.—The area sown with the early variety is estimated at 59,962 acres against 34,614 acres last year, and that sown with the late variety is reported at 32,092 acres against 23,388 acres estimated last year.

Outturn.—The estimated outturn of early cotton amounts to 11,281 bales and that of late cotton to 9,460 bales Last year's estimates were 7,288 and 10,426 bales, respectively.

Adding to this year's estimates 5 per cent. for the cotton crop grown in the Native States for which no statistics are recorded, the total early and late crop is estimated at 11,845 and 9,933 bales, respectively The total outturn of the cotton crops (both early and late) for the Province as a whole works out to 21,778 bales against 18,600 bales last year.
